

“Arctic Bort – 6.0”

Arctic-Bort specialists have developed a new prototype of a boat made of ultra-strong material with rigid cylinders each with a diameter of 500 mm. The main forms of planing contours are made in the form of Triklin, which makes it possible to instantly exit the vessel onto the glider, without significant motor loads.

Technical specifications:

- Length - 6000mm
- Width - 2400mm
- Diameter of cylinders - 500mm
- Killevost on the transom - 21g
- Displacement – 950 kg
- Lifting capacity max. - 1100 kg
- Maximum number - 10 people
- Recommended outboard motor - 90 l / s
- Maximum motor - 150 l / s

Basic equipment:

- Steering console Lux
- Nasal locker -1pcs
- Feed locker - 3pcs
- Fuel tanks - 2pcs (100L and 60L)
- Auto pump - 2 pc.
- Ducks mooring - 4pcs
- Self-draining cockpit
- Anti-slip coating on the deck
- Additional seats
- Side rope

Production time 3-5 months., Depending on the order and after an advance payment of 80%.

You can order additionally:

- Control devices
- Fuel tanks 2x100l
- Targa with running lights
- Captain's chair with a shock-absorbing pillow, swivel with a locking handle every 90g.
- navigation
- Awning transportation
- Awning chassis
- Walkie talkie + antenna
- Equipment for fishing trolling

- Anchoring and mooring equipment
- Fresh water system
- Safety equipment
- First-aid kit ship
- Original design
