

## Arctic Bort 7.8 Cab

The company "Arctic" offers a new model of a boat of marine design for fishing, diving, service and traveling character with a cabin for 6 people. The boat is completely made of HDPE, this material is by far the most reliable of the plastics used in small shipbuilding, embrittlement occurs at minus 70 gr C, is resistant to impacts on sharp rocks, the boat can reach any coastline without damaging the hull. Thanks to the free cockpit, work can be done from the bow and the stern of the boat. The bottom of the vessel is made in the form of Triclin, this allows the boat to instantly go on the glider, which significantly reduces the load on the motor and increases speed characteristics. The cabin is equipped with two chairs for the captain and navigator and two sofas-lockers, it is possible to replace one sofa with a galley. The steering console is equipped with various instruments for monitoring the ship, it is possible to install navigation equipment. For a more comfortable stay in the cabin, heating or air conditioning Webasto.

In this model, we tried to combine excellent value for money.

#### **Technical specifications:**

Boat length - 7.8 m, width - 2.7 m, cylinders - 0.5 m filled with polystyrene, bottom thickness 10 mm, deadlift on the transom - 21 g, empty displacement - 2.5 t, recommended motor - 250 l / s, installation of 2- x motors of 250 l / s, Stability, seaworthiness and controllability complies with CE requirements for ships designed for operation in river and sea basins of category "M" and for ships intended for navigation in marine areas of category IV complexity of 2 categories. The boat has seaworthy properties that ensure the use of its technical means and safety of navigation when the sea is rough up to 3 points inclusive in the displacement mode and up to 2 points inclusive in the planing mode.

#### **Basic equipment:**

Steering console, steering wheel, gas / reverse machine, battery - 2 pcs, electric pump. - 2 pcs, heater or air conditioner Webasto; navigation lights, lockers sofas in the superstructure, two captain and navigator chairs, splash-proof windows, splash-proof door to the superstructure; anchor-mooring device, gangway and bow rails, fuel system for 300l, ventilation, electric power system; control devices; hydraulic control system, wipers, fender beam, deck, gangways covered with corrugated AMG, insulation and interior trim.

Production time 5-7 months. depending on the order.

**Possible additional equipment:**

Navigation equipment: radar, multifunction display, echo sounder, etc. (according to customer requirements); shore food; inverter 12 / 220V; galley; installation of a lifting device (winch, mini crane) on the deck, installation of two motors (spark), installation of a targha with running lights, installation of an awning on the aft part of the cabin, lounge zone device (sofas, table) in the stern of the boat, execution is possible, as in black and yellow-black.

**Extra cost specify specifications on request.**
