

## “Arctic Bort – 8.7”

Arctic-Bort specialists have developed a new prototype of a boat made of ultra-strong material with rigid double cylinders each with a diameter of 500 mm. The main forms of planing contours are made in the form of Triklin, which makes it possible to instantly exit the vessel onto the glider, without significant motor loads.

### Technical specifications:

- Length - 8700mm
- Width - 2900mm
- Diameter of double cylinders - 500mm
- Killevost on the transom - 21g
- Displacement – 1800 kg
- Lifting capacity max. - 3000 kg
- Maximum number - 12 people

- Recommended outboard motor – 2 x 250 l / s
- Maximum motor – 2 x 350 l / s

**Basic equipment:**

- Steering console Lux
- Nasal locker -1pcs
- Feed locker - 3pcs
- Fuel tanks - 2pcs x 150L = 300L
- Auto pump - 2 pc.
- Ducks mooring - 4pcs
- Self-draining cockpit
- Anti-slip coating on the deck
- Targa with running lights
- Side rope

**You can order additionally:**

- Control devices
- Fuel tanks 2x400l
- Captain's chair with a shock-absorbing pillow, swivel with a locking handle every 90g.
- navigation
- Additional seats
- Awning transportation
- Awning chassis
- Walkie talkie + antenna

- Equipment for fishing trolling
- Anchoring and mooring equipment
- Fresh water system
- Safety equipment • First-aid kit ship
- Original design
